

C o n t e n t s

MATHEMATICS

V. Balan, Simona Bibic	
Effects of averaging on SODE models of dynamic cell processes	3
Poliana Stefanescu, S. C. Stefanescu	
Using Benini's one parameter distribution to study the income volatility	13
C. Pana	
Concerning a problem of E. Borel	23
C.A. Muresan	
Computerised algebra used to calculate X^n cost and some costs from conversions of p-base system with references of p-adic numbers from Z_p and Q_p	33
Marcela Ursache, Gelica Stanescu, D. Bolcu, Ludmila Sass, Alina Duta	
Contributions to the determining of the intersections of prismatic bodies by the use of the representation method for the parallel vectors' projection	41

PHYSICS

Al. Mihailescu, Gh. Cata-Danil	
Identification of the discrete gamma-rays following the $^{104}\text{Ru}(p,n)^{104}\text{Rh}$ nuclear reaction	53
R. Ispasoiu, T. Crawford, B. Johnston, C. Shaw, S. Kasapi, J. Goertz, O. Rinaudo, P. Ouimet	
Reduction of the acquisition time for CMOS time-resolved photon emission by optimized IR detection	63
Elena Dugheanu	
Method of calibration of high accuracy line standards with nominal length between 0.1 mm to 1000 mm using an interferential comparator uncertainty budget	69
